HIGH DENSITY LIDAR

ACCURATE DATASETS FOR ANY PROJECT

Projects include geotechnical hazard change detection, assessments of hydro-electric dam facilities and highway as-builts.

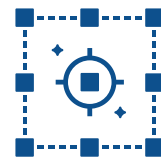

UAV or Manned Aircraft

Multiple platforms allow MSI to accommodate various project sizes.

+ 100 pts per square metre

Using high collection rates at close range, MSI is able to customize the point density based on the project needs.

5cm RMSE

MSI collects on site ground control within each project to provide the most accurate datasets.

Precision, Innovation, Partnership

Please visit our webpage for more information or contact MSI to discuss your project.
